

AMY Y ZHANG

## ABOUT

I'm a designer and core member from Montgomery, NJ. I'm studying Biology, Studio Art, and Digital Arts, and I'm a Stamps Scholar. Talk to me about ecology/evolution and the role of art and science in society! I enjoy thinking through UX problems, and I need to work on simplification and consistency in my UI :)

I interned this past summer at the Smithsonian Tropical Research Institute in Panama. I love trees, crows, and frozen yogurt.
